

RUGS

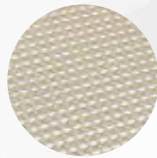

Traditional Handloom

Solo which was known as Surakarta in 1755 is the capital city of Kasunan Surakarta Hadiningrat. The people who are highly cultured and artful, also renowned for their courtesy and hospitality, produce many artwork such as: Batik, Carving, Ikat Weaving, manmade Carpet / Area Rugs and natural-made weaving et cetera.

In order to preserve local culture and handicrafts, we develop Handmade Carpet (which relies heavily on manual skills) and introduce them overseas through international exhibitions.

Our products retain highly sophisticated art value within reasonable price.

Our rugs are fully handmade and the manufacturing process may take 1-3 weeks per rugs. Our rugs has an anti-slip base on it, functions as an anti-slip so it doesnt slide on the surface.

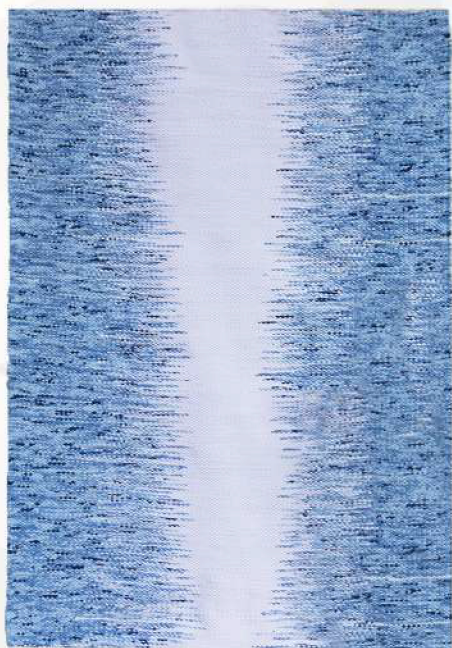

ANTISLIP

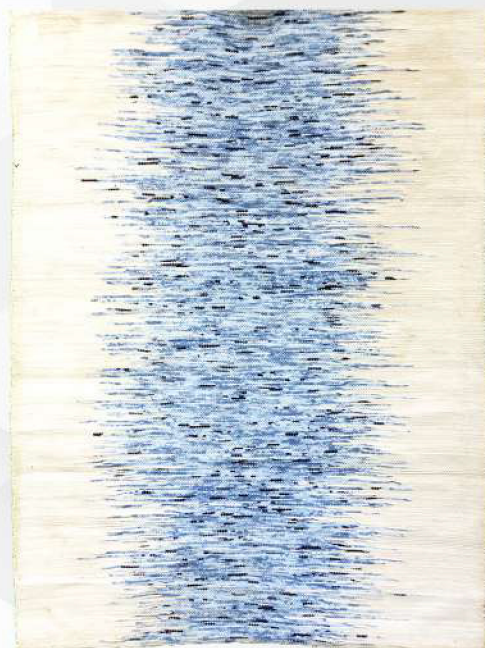

A carpet is a textile floor covering typically consisting of an upper layer of pile attached to a backing. The pile was traditionally made from wool, but since the 20th century, synthetic fibers such as polypropylene, nylon or polyester are often used, as these fibers are less expensive than wool. The pile usually consists of twisted tufts that are typically heat-treated to maintain their structure. The term carpet is often used in a similar context to the term rug, but rugs are typically considered to be smaller than a room and not attached to the floor.

Carpets can be produced on a loom quite similarly to woven fabric, made using needle felts, knotted by hand (in oriental rugs), made with their pile injected into a backing material (called tufting), flatwoven, made by hooking wool or cotton through the meshes of a sturdy fabric, or embroidered. Carpet is commonly made in widths of 12 feet (3.7 m) and 15 feet (4.6 m) in the US and 4 m (13 ft) and 5 m (16 ft) in Europe. Since the 19th and 20th century, where necessary for wall-to-wall carpet, different widths of carpet can be seamed together with a seaming iron and seam tape (formerly it was sewn together) and fixed to a floor over a cushioned underlay (pad) using nails, tack strips (known in the UK as gripper rods), adhesives, or occasionally decorative metal stair rods. Wall-to-wall carpet is distinguished from rugs or mats, which are loose-laid floor coverings, as wall to wall carpet is fixed to the floor and covers a much larger area.
